Not really

Lock down project #1 November 2020 I bought my first guitar - a beatiful vintage Höfner from 1950. The first chords were painfull, but today I'm pretty darn good thanks to all the

Other impressive stuff

professional. The background research and the self-made illustrations for the book we're pretty good, so maybe one day I'll do it properly

the summer of 1996 🤘

Lock down project #2

down winter.

that regardless.

I wrote a book

I was backing dancer for Jodle Birge Yes it was me. And no shame in admitting if you recognize my face from somewhere, it's most likely from that amazing concert at Sølund Festival in

I finally managed to finish my HTML / CSS beginner course... It's actually not

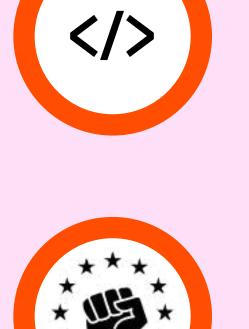

particularly impressive that it took me 8 months to finish a 8 week course, but I'm glad I managed - and somehow it kind of got to me, so now I can't

It's not particularly good, but I won a bet and learned a lot doing the

research. The book was about structuring a project process as a creative

boring evenings the Covid pandemic offered in form of a long dark lock-

I've also nitted a lot of cardigans during the pandemic, but I'd probably done

stop. **Spokesperson**

Tailored leisure time activities

EU thought it was a great idea to send me round Europe to participate in panel debates and do talks about the topics. It was great fun, but it also felt a little weird to be asked to step onto a stage and talk about being a woman (didn't feel like a particular unique quality to possess). But I learned a whole lot about doing presentations and participating in dicussions on stage.

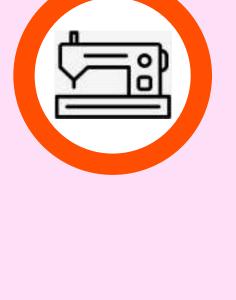

I do a killer piped buttonhole, can houte couture the sh%/! out an old

bedsheet, but if you ask me to fix a broken zipper or sew curtains for your

summerhouse, I'll politely - with a touch of arrogance, tell you no! In truth I

A few years ago it was very modern to talk about female entrepreneurs,

female engineers and women working in the IT industry. Some people in the

find sewing incredibly boring but regard it as a necessity to be able to wear the outfits I can imagine.

Volunteer Work

New Loop is a project that aims to create a refund/recycle system around take away packaging. The project is focused on creating a system that will

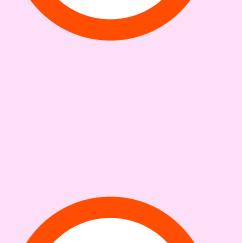

motivate the user to return used packaging, allowing it to be reused again and again, and thereby eliminate plastic waste generated from packaging. I somehow managed to get entageled with this project, and sometimes help them out as a spokesperson at events lige Folkemødet in Allinge and environmental conferences. (It's a super ambitious and nice project, you should read more about it here)

A teacher friend from KEA asked me to help out with her Interactive Design

introduction to their project work. It was a great challenge to try and

concentrate my hard earned experiene into a 120 min. lecture, but the

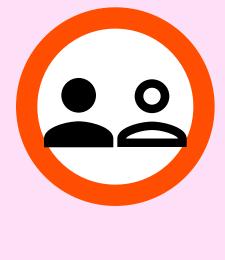

class, by giving the students a crash course in IT-project management as an

students seemed alert and asked some great questions, so I think I did pretty good. Another teacher friend asked me to come by and help with her arts and crafts class for four-graders, teaching them to create jewelery and clothes from recycled material. A very different experience, but HILARIOUS!

Guest Lecturer (2016)

"Adult" helper at entrepreneur workshop for children (2015-16) I used to hang out at the Rainmaking Loft, back in the day when it just opened as a co-working space. I was asked to help out with a one-day workshop for children age 7 - 10, teaching them about innovation and entrepreneurship (no parents allowed). The kids ended up teaching us more than we could teach them with there weird, curious and crooked thoughts and perceptions.

Mentor for students at IT faculty DTU (2016 - 18) I had the pleasure of helping fourth semester students at DTU Ballerup with a their app desing and development projects. I presented "real life" client cases to them and they we're challenged to develop the solutions based on the case presented. I gave them feedback and guidance during their project, some of them came up with brilliant ideas and suggestions that hadn't been considered by "the professionals" in the real life case scenarios.

President of the Student Counsil at IHK (DTU) (2000 - 05) As a student at IHK (now DTU) I somehow became part of the board of the student counsel ("De Studerendes Råd"). After a few weeks I was asked to take the post as the president of the board. They kept re-electing me for the
